

What is AGICAP?

The 'primary care clinical research management agency' is the part of the Institut d'Investigació en Atenció Primària devoted to the promotion and management of clinical trials with drugs.

Our certified investigators' network endorses the success of **enrollment in your clinical trial**.

We offer both promoters and CROs **a sole ethics committee**, fast recruiting, data quality, **faster paperwork**, and overall quickness in the process. Besides, we take care of the necessary authorizations, write contracts and clear the proper payments.

Our coverage includes 87% of the total population (6M) of Catalunya: **hundreds of thousands of patients**, from which to select candidates for your clinical trials.

Our objectives

1. The quest for quality in format of clinical trials in primary care in Catalunya
2. The complete support to the promoter of clinical trials, concerning the viability as well as the technical, scientific, and administrative suitability.
3. The planning and implementation of clinical trials, both intra- and extra-murals, previously approved by the Ethics Committee of the foundation.
4. The training of primary care professionals for research with clinical trials.
5. The promotion of inter-services' collaboration across the public network.
6. The overall support to the free flow of research ideas, projects, abilities and needs in primary care in Catalunya.

Our services

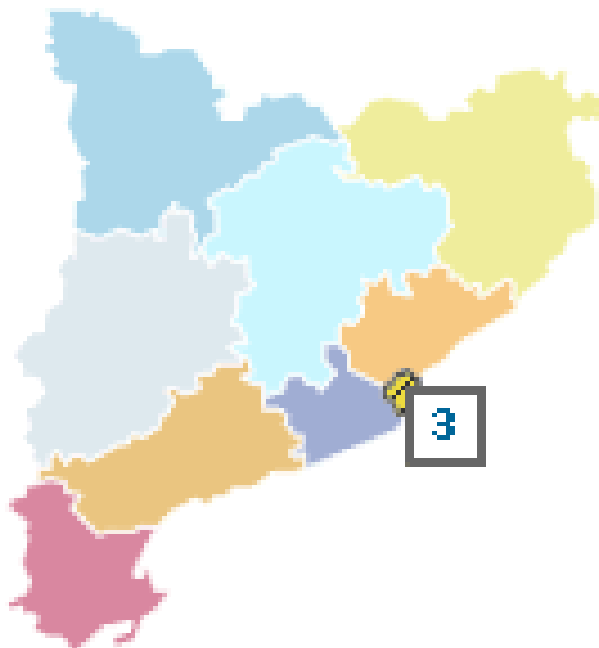

- Assessment on design and feasibility of essays in primary care (clinical trials and post-reg studies), by experienced clinical investigators in all health issues.
- A central ethics committee that oversees all public primary care centers, and private ones under contract.
- **A complete roster of experienced clinical investigators** providing clinical trials with standards of thoroughness and professionalism.
- Confidentiality along the whole process

- Quickness in the administrative management.
- Fast handling of contracts and payments.
- **Quality and celerity of recruiting.**

Our person power

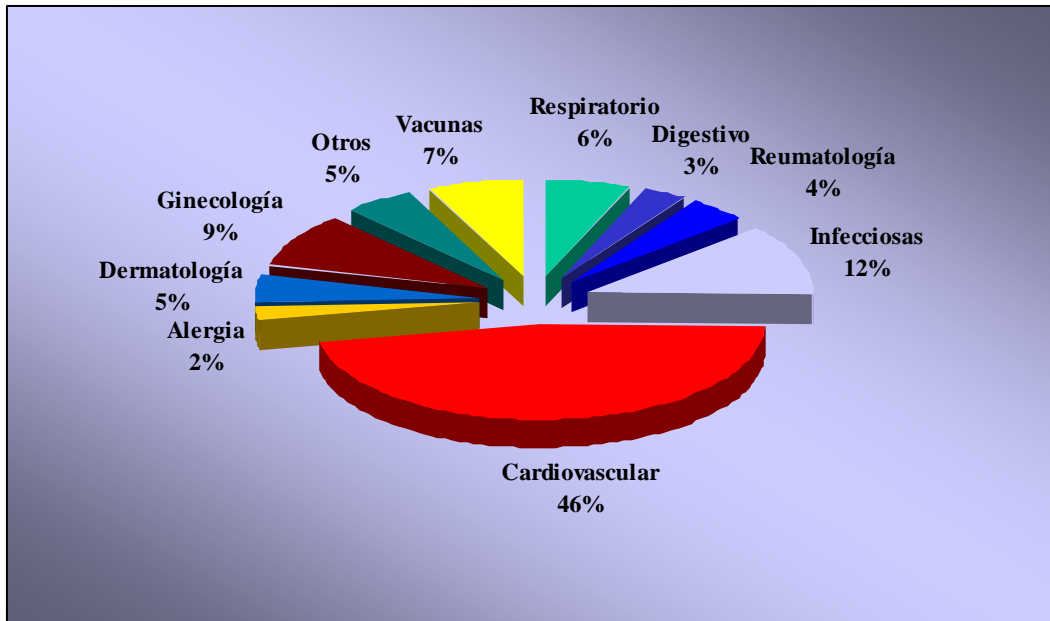

Professionals with experience in realization of clinical trials: GPs, nurses, pediatricians, ob-gynecologists, pharmacologists and pharmacists working in **over 70 primary care centers around Catalunya.**

The territorial organization of AGICAP is as follows:

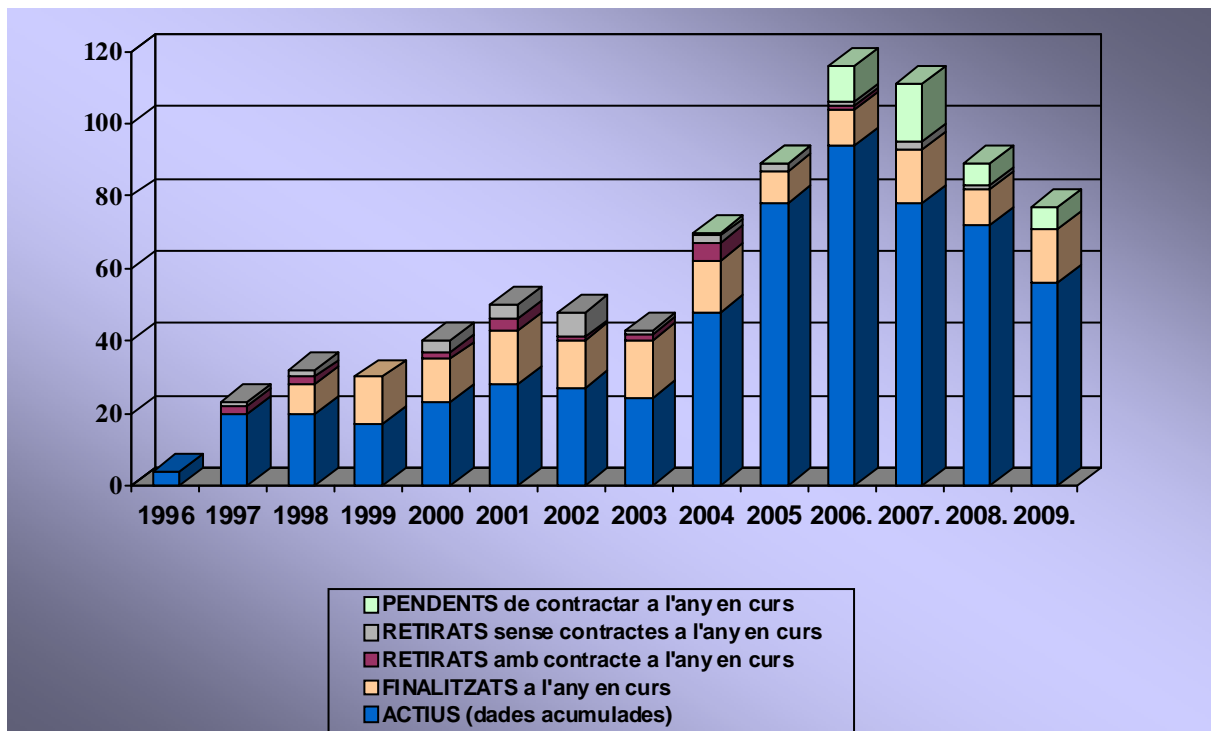

Lleida
Tarragona
Barcelona
Girona
Metropolitana Sud
Metropolitana Nord
Catalunya Central
Alt Pirineu i Aran
Terres de l'Ebre
Entitats alienes a l'ICS

About 200 investigators credited by AGICAP work actually in different fields of Primary Care.

Last years, the number of clinical trials managed by AGICAP has grown steadily
