9. AUTHORISATION OF THE CENTRE(S) LEGAL REPRESENTATIVE

By presenting this proposal, the undersigned accept the clauses of this calling, and agree to use the requested amount, if granted, to fulfil the objectives included; moreover, they accept that the requested financial support shall not be devoted to the same objectives that were already financed in full (or in part) by other entities.

12. STATEMENT OF COMPLIANCE WITH GOOD SCIENTIFIC PRACTICE

The organisation I represent has a **CODE OF GOOD SCIENTIFIC PRACTICE*** by which the research and scientific production conducted in this organisation is managed, its main objectives being to favour the improvement of science quality, and the prevention of research integrity issues (please, attach a copy of the centre's Code of Good Scientific Practice). The undersigned has read and understood this code.

Principal Investigator of the Proposal

Legal Representative of the Organisation

*It is necessary to send your code of good scientific practice.

My organisation has no **CODE OF GOOD SCIENTIFIC PRACTICE**, but in the meantime, as the principal investigator of a research proposal presented to the Fundació La Marató de TV3 calling, all the following points will be considered, and will govern the development of the project:

- The research staff under training who will participate in the project will have a mentor, who shall have the typical tasks of this role, and the prioritised tasks will be always related to training.
- The research protocol, as a written text of the proposed study, and in its corresponding sections, has no secret part, and will be followed accurately. Whatever additional or complementary research question to the presented project will imply a written account of the corresponding (new) research protocol. Any research protocol involving the use of computer files, or the elaboration of databases with information on subjects, shall guarantee its confidentiality, and shall be subjected to the regulations in force in matter of database registers.
- Regardless the (co-)financing, either public or private, of the research project, the responsibility for the design and development of the research corresponds to the research team, and the publication of the results, be these positive or negative, is mandatory. Any agreement with a supporting entity directly or indirectly related to the conducted research will be in full, readily accessible written form.
- The publication and diffusion (presentation) of the research results, be these positive or negative, or different to the foreseen expectations, are mandatory. Before the scientific publication, no communication or diffusion of the research to the mass media is allowed, except for exceptional cases where the journals' editorial policies contemplate it. Fragmented, duplicate or redundant publication is to be avoided.
- Authorship of the scientific works (oral or written) derived from this project will be based on the (significant) contribution to the research process, without consideration to hierarchical position, working or professional relationship, and being liable for the full contents of the work. Other contributions of lesser relevance will be reflected in the Acknowledgements section.
- Any uncertainty or conflict that may occur regarding the integrity of the research will be solved by the Fundació La Marató de TV3.
